SAN LUIS OBISPO, CALIFORNIA: Launch of Tyler Technologies re:SearchCA in San Luis Obispo County

On January 4th, San Luis Obispo County Superior Court launched Tyler Technologies re:SearchCA, a web-based platform that grants registered users remote access to public court records and documents.

San Luis Obispo County is the first county in California to introduce this new, multi-jurisdictional case search platform. The court is excited to provide this modern, more efficient way to access court records. IT staff worked closely with Tyler Technologies to develop and implement this solution for remote public access to further enhance transparency and accessibility.

re:SearchCA is a free and secure online portal that provides public access from anywhere, at anytime, and from any device. In compliance with CRC 2.503, certain case types and documents are limited. Access is determined by the user's role (licensed attorney, registered user, etc.). Tyler provides detailed responses to a variety of FAQs [here](#).

For security purposes, this public access site requires registration if accessed remotely. The court will provide kiosk stations at all branches. These kiosks will provide enhanced access to documents on case types such as criminal, family law, and domestic violence, which are limited to courthouse electronic access. San Luis Obispo Superior Court is committed to leveraging technology and will continue to seek further ways to enhance accessibility in the future.
